

EcoLEDLighting to Launch Energy Efficient Luminaries at ARC07

12 February 2007 - Sunbury, UK: LED lighting technology specialist, EcoLEDLighting is launching its new range of energy efficient, Parts L1 and 2 compliant, MR16 LED replacements at ARC 07. The company has reduced the heat output of the luminaries by 75+% to produce an unbreakable, low maintenance unit that is guaranteed for 6 years. The SMT25 LED unit for security, marine and task areas (equivalent to 100+W) and the company's Emergency Stairway Lighting range, will also be on stand M39b.

Compliant with Part L1 (A & B) and Part L2 (A & B) amendments to the Building Regulations, EcoLEDLighting's MR16 LED replacements are recyclable, low maintenance, unbreakable (no filament exists in the units) and are supplied with a six-year guarantee. They are also available in fully dimmable and track spotlight variants.

Typical applications for the MR16 range include: replacement for dichroic and halogen light unit's; elevators; high-ceilings in theatres, offices, cinemas and retail outlets; all types of exterior lighting application - as well eco-sites where energy is limited to solar and wind generation.

EcoLEDLighting has 22 years cutting edge LED lighting technology, design and implementation experience in the commercial and military aerospace industry. The company's designs and products reflect this experience. All products are 100% recyclable, durable, state-of-the-art, and suitable for any project where energy cost, ambient heat reduction and ultimate durability are key requirements.

For further information on EcoLEDLighting visit stand M39b. Or, alternatively call 0845 094 6010 or visit www.ecoledlighting.com.
